

CLAIMS

I claim:

1. A tint composition for filling in drywall panel gaps, screw holes, cracks, nail pops, and dings comprising:

5 a binder;

a filler;

a surfactant; and

a light color tint.

10 2. The tint composition for filling in drywall panel imperfections according to claim 1, wherein the light color tint is yellow.

15 3. The tint for drywall panel imperfections according to claim 2, wherein the yellow tint is yellow ochre.

20 4. A method of identifying the touching up adequacy of applied drywall paste between drywall panels and in screw holes, cracks, nail pops, and dings comprising:

applying drywall paste to fill in the gaps between

installed drywall panels and in screw holes, cracks, nail pops, and dings;

5 drying the applied drywall paste; and

10 applying a tinted drywall paste to touch up the applied drywall paste;

15 whereby identification of the touch up paste notifies the plasterer that a touch up has been made.

20 5. The method according to claim 4, wherein the tint is yellow.

25 6. The method according to claim 5, wherein the yellow tint
is yellow ochre.
